Professional Summary

Cybersecurity and Communications Engineering student with hands-on experience in Information Security, network administration, and ethical hacking through internships and specialized training programs. Knowledge of GRC, SOC operations, vulnerability assessment, Active Directory security concepts, enterprise networking, and security best practices. Seeking a Cybersecurity Internship to apply analytical, networking, and security skills in protecting organizational assets.

Education

Benha University – Shoubra Faculty of Engineering
B.Sc. in Communications and Electronics Engineering (Expected 2027)

Experience

Information Security Intern, Banque Misr Aug 2025

- Gained exposure to GRC, SOC, Security Assurance, and Security Architecture functions.
- Analyzed cyberattack case studies to identify security risks and governance implications.
- Participated in KPI discussions focused on improving incident response effectiveness.

Networking Intern, Telecom Egypt Jun 2025–Aug 2025

- Completed CCNA-aligned training through Cisco Networking Academy.
- Configured and troubleshot Cisco routers and switches in simulated enterprise environments.
- Applied IP addressing, subnetting, and routing concepts across multiple network topologies.

Training & Certifications

NTI – CEH v13 Training Jan 2026–Feb 2026

- Studied ethical hacking methodologies, reconnaissance, vulnerability assessment, and security best practices.

DEPI – Infrastructure and Network Track (HCIA/HCIP) Jun 2025–Dec 2025

- Developed practical skills in Huawei enterprise networking, routing, switching, and troubleshooting.

Projects

SecureNet X – Enterprise Infrastructure Project

- Collaborated within a 6-member team to design a secure enterprise network using Huawei technologies.
- Implemented 10+ technologies including OSPF, BGP, MPLS, LDP, VPN, NAT, ACLs, VRRP, and AAA.
- Integrated DHCP, DNS, SNMP, and IPv6 services to improve availability and monitoring capabilities.

NTI Red Team Final Project

- Conducted an authorized security assessment against a simulated banking environment.
- Performed web application enumeration and Active Directory discovery activities.
- Delivered a technical report documenting findings and remediation recommendations.

Thirty-Two Register MIPS CPU

- Implemented a 32-register processor supporting 24 instructions using Logisim.

Solar Tracker System

- Developed an Arduino-based solar tracking system that improved energy capture efficiency by 15%.

Technical Skills

Cybersecurity: Information Security, Vulnerability Assessment, Ethical Hacking Fundamentals, Active Directory Fundamentals, Incident Response Fundamentals, GRC, SOC Exposure
Networking: OSPF, BGP, MPLS, LDP, NAT, ACLs, VLANs, AAA, IPv4/IPv6, Network Troubleshooting, CCNA Fundamentals, Huawei Networking
Tools: Kali Linux, SQLMap, Cisco Packet Tracer, Huawei eNSP, Logisim, Proteus, Arduino
Programming: Python, Java, C, C++, Dart
Soft Skills: Problem Solving, Teamwork, Communication, Adaptability

Languages

Arabic (Native)
English (Intermediate)
