HAZEM AHMED ABDELFATTAH

Cybersecurity | SOC Analyst | Network Security

+20 1011762741 | hazem418402@gmail.com

Cairo, Egypt | linkedin.com/in/hazemahmad | github.com/hazemahmed283

Professional Summary

Cybersecurity and Communications Engineering student with hands-on experience in security monitoring, network security, vulnerability assessment, ethical hacking, and enterprise networking. Practical experience with SIEM and security monitoring labs, vulnerability scanning, Active Directory security concepts, and network troubleshooting. Seeking a Junior Cybersecurity, SOC Analyst, or Network Security role to apply technical and analytical skills in security monitoring, threat detection, and incident response.

Education

B.Sc. in Communications and Electronics Engineering **Expected 2027**
Shoubra Faculty of Engineering, Benha University Egypt

Training & Experience

SOC Analyst Trainee **Aug 2026**
National Telecommunication Institute (NTI) Egypt

- Worked with **FortiAnalyzer** and **FortiSIEM** concepts, including security-event analysis, event/query baselines, and alert handling.
- Implemented **FortiGate log forwarding to Splunk**, enabling centralized security-event analysis and real-time detection of brute-force and port-scanning activity.
- Applied SOC workflows including **log analysis, alert triage, event investigation, and threat detection**.

Cybersecurity Trainee **Jun 2026 – Aug 2026**
Hatteras IT Egypt

- Performed practical **Tenable Nessus** vulnerability scans using port, credentialed, and non-credentialed scan types.
- Built a security assessment environment using **Nessus, Kali Linux, Windows, and Metasploit** and performed practical vulnerability assessments.
- Applied **CVSS** and vulnerability rating remediation concepts to analyze and prioritize security findings.

Ethical Hacking Trainee **Jan 2026 – Feb 2026**
National Telecommunication Institute (NTI) Egypt

- Studied ethical hacking methodologies covering **reconnaissance, vulnerability assessment, and penetration testing fundamentals**.
- Practiced security assessment techniques in controlled environments using **Kali Linux** and common penetration testing tools.
- Applied ethical hacking concepts to identify security weaknesses and understand appropriate remediation practices.

Information Security Intern **Aug 2025**
Banque Misr Egypt

- Gained practical exposure to **GRC, SOC, Security Assurance, and Security Architecture** functions.
- Analyzed cyberattack case studies to identify security risks and governance implications.
- Participated in KPI discussions focused on improving incident-response effectiveness.

Networking Intern **Jun 2025 – Aug 2025**
Telecom Egypt Egypt

- Completed CCNA-aligned networking training through Cisco Networking Academy.
- Configured and troubleshot Cisco routers and switches in simulated enterprise environments.
- Applied **IP addressing, subnetting, and routing** concepts across multiple network topologies.

Technical Skills

Cybersecurity: SOC Operations, SIEM, Log Analysis, Incident Response, Vulnerability Assessment, Ethical Hacking, GRC, Active Directory

Security Tools: Splunk, FortiGate, FortiSIEM, FortiAnalyzer, Nessus, Kali Linux, Metasploit, Nmap, SQLMap

Networking: TCP/IP, IPv4/IPv6, VLANs, OSPF, BGP, MPLS, LDP, NAT, ACLs, AAA, Network Troubleshooting, Huawei Networking

Programming: Python, C, C++, Java

Projects

SOC Monitoring & Threat Detection Lab **2026**
Built a security monitoring environment using **FortiGate** and **Splunk**. Implemented centralized log forwarding and developed detections for brute-force authentication attempts and port-scanning activity.

Vulnerability Assessment Lab **2026**
Configured **Nessus, Kali Linux, Windows, and Metasploit** in a controlled lab environment and performed port, credentialed, and non-credentialed vulnerability scans.

SecureNet X – Enterprise Infrastructure Project **2025**
Collaborated in a 6-member team to design a secure enterprise network using Huawei technologies. Implemented 10+ technologies including **OSPF, BGP, MPLS, LDP, VPN, NAT, ACLs, VRRP, and AAA**, with DHCP, DNS, SNMP, and IPv6 services.

NTI Red Team Final Project **2026**
Conducted an authorized security assessment against a simulated banking environment. Performed web application enumeration and Active Directory discovery and delivered a technical report with findings and remediation recommendations.

Certifications

HCIA/HCIP Infrastructure & Network Training – DEPI 2025
CCNA: Enterprise Networking, Security, and Automation – Cisco Networking Academy 2025
CCNA: Introduction to Networks – Cisco Networking Academy 2025
CCNA: Switching, Routing, and Wireless Essentials – Cisco Networking Academy 2025
